

Range of single shell seats designed by Pascual Salvador which come in the options of one armchair (just one seat) or as a combination of seats (2 or 3).

The exterior parts of the bench are made from textured and anodized polished aluminum, which are mounted on an interior steel structure.

The single shell seat is made from a 12 mm beech plywood with an ergonomic curvature and finished in a transparent or colored varnish.

Optionally the seats can be upholstered with individual cushions or completely with SOFT upholstery, which incorporates a flexible 40 mm polyurethane base.
