

Multiple skating system of 2 to 4 units. The seat area is configured in a single continuous block framed by polished and anodized aluminium sections and with a long black synthetic leather upholstered cushion.

The backrest is made up of a long cushion, also a single piece, with supports at either end which join it to the

bench frame. The upholstery of this cushion combines with that of the seat. Bench legs in polished stainless steel.

The backrest of the seat is formed by an original long cushion in the form of a roller (BALANCE RULL model) and the feet are shaped by a column and a round chromeplated steel base.
