

Multiple seating system of 2 to 5 seats for interior and exterior use with ergonomically designed seat and backrest manufactured in cast aluminium. The legs and support bar of the bench combine cast aluminium pieces with extruded aluminium profile measuring 80x60x4 mm. The finish of the seat and backrest can be in textured and anodized aluminium, in polished-brushed and anodized aluminium or in epoxy paint for exteriors. Optional bench table with WISA table top suitable for exterior use. Optional armrests in 20x20x2 mm polished and anodized aluminium tube. From an innovative and avant-garde perspective that searches for contact with nature and the outdoors, the renowned designer J. Busquets has created the GOLF multiple seating system, entirely manufactured in anodized aluminium. Its design of clean and essential geometric forms enables perfect integration with in the most innovative architectural spaces, both indoors and outdoors.
