

Multiple seating system with high backrest for transit and waiting areas. Seats manufactured in 2.5 mm thick polished and perforated sheet steel, finished in epoxy paint. Side supports and bench legs in cast aluminium with shiny polished finish. Bench support bar made up of rectangular steel sections measuring 60x30x2 mm.

The seats can have independent polyurethane cushions for the seat, backrest and headrest (HP model) or can be supplied with complete synthetic leather upholstery (model HC).

Optional bench table with black compact phenolic table top measuring 490x390 mm. Optional armrests in shiny polished cast aluminium.

AIR HC is an extension of the base series that consists of providing the seat with a higher backrest with complete upholstery in a single piece leather cushion.
