

Keeping to the structure of the previous design, the TRAIN series proposes a generous anti-slip polypropylene monoshell seat with a high backrest and is upholstered with three independent cushions.

The seat is designed to provide the user with top features in comfort, which makes it ideal for transit and waiting rooms in which long stays are not unusual.

Series of injected polypropylene seats. Bench of 2 to 5 seats. Frame made up of two 60x20x2 cold-laminated steel rectangular tubes. Textured cast aluminium legs and armrests. Upholstered accessories may optionally be fitted over the seat, backrest and headrest, each independently of the others.

Optional 500x500 bench table with black laminated table top, edged in 20 mm trim.

Optional: 500x500 table.
