

From an innovative and avant-garde perspective that searches for contact with nature and the outdoors, the renowned designer J. Busquets has created the GOLF furniture range, entirely manufactured in anodized aluminium. It's clean design and essential geometric forms enable perfect integration within the most innovative architectural spaces, both indoors and outdoors. Series of stackable chairs with and without armrests (models CO3500 and SO3500) for exterior and interior use, manufactured in anodized aluminium. The well-crafted design affords an optimum comfort level and provides a solid and slim image. The finish of the seat and backrest can be in textured aluminium, polished-brushed aluminium or in epoxy paint for exteriors, available in the specific colours of the series.
