Stool with polished cast aluminium seat or, optionally, in integral polyurethane. Its frame and footrest are formed by chrome-plated or epoxy painted steel tube.

Its design strikes an intelligent balance between the demands of a functional product, with beautiful, modern and geometrical lines, and the ergonomics and solidity of the article.

Innovatively designed stool with frame manufactured in 22 mm Ø steel tube, with chrome or epoxy paint finishes.

The seat can be in flexible integral polyurethane or textured and anodized cast aluminium.

Polyurethane finishes in a variety of colours, according to chart references.
